

# INTRODUCTION TO THE COURSE

## LEARN ARABIC BEGGINER LEVEL

BY: Samer Masoud

# COUSRE STRUCTURE

Arabic consists of 28 to 29 letters.

Each lecture will cover 4 to 5 letters, making the pace manageable and focused.

The beginner level will end after i make sure that you are good with the alphabets ,then we are going to move to the intermediate level ,which will focus mainly on reading and writing .

After every two lectures, we will take a break from the alphabet to have an idea about the Arabic language. These could include topics like grammatical structure, sentence types, or other unique aspects of Arabic—not just comparisons with English but insights into how Arabic works as a system.

The course will also include sessions for listening and conversation practice, which are essential for language development at every stage.

# TEACHING METHOD

My teaching style is interactive and student-centered. This is not a lecture where I speak and you listen silently. You will be engaged throughout, participating in discussions, answering questions, and practicing with me.

Every letter will be introduced with:

Its Arabic pronunciation

Its approximate English equivalent

Its various written forms depending on its position in a word (beginning, middle, end, and isolated).

After each lecture, you will receive a simple homework assignment, and we will review it together in the next session to ensure everything is understood.

Each session will last between 30 minutes to 1 hour, depending on the material and the flow of the lesson.

We will also make sure to review previous lessons regularly throughout the course .
